EH&S Products Catalog 2026

616.916.1178 | www.evolvedsafety.com

Welcome to the Evolution in EH&S Resources

Save time. Save Money. Gain Expert Guidance.

Evolved Safety was born from a need in the marketplace to provide best in class EH&S solutions from a knowledgeable and helpful resource. We put your needs first, pick-up the phone when you call, and do what we can to ensure your happiness.

Evolved Approach

Evolved Safety works as your buyer's agent to help source training materials from the top vendors in the EH&S training market with no additional fees or up-charge. Our goal is to make sourcing, implementing, and managing safety training uncomplicated and assist customers through program

After a **needs assessment** we source the best options for your review relative to your price, delivery format, and content needs.

We fully support you through program implementation, including migrating vendors.

Evolved Safety is an **extension of your safety team** addressing your needs throughout the duration of your program.

Evolved Customer Service

Our number one goal is to offer knowledgeable, attentive, and focused customer service for your needs. We're there when you give us a call and always ready to assist.

Evolved Safety Culture

Your interests come first. With our expert, unbiased expertise we evaluate your needs, find the best solutions, and provide resources that help you build an effective safety culture and safety program. We work for you, not the vendors, to give you choice, flexibility, advocacy, and transparency. With one call and a single point of contact, we make sourcing your safety materials effortless.

Evolved Safety provides multiple safety training options ensuring you meet your training goals and requirements.

A More Intelligent Source for Your EH&S Resources »

Safety Products & Services for Manufacturing, Construction, & OSHA Compliance

For over ten years, Evolved Safety has helped thousands of safety professionals streamline their environmental, health and safety training and management solution sourcing. Working with Evolved Safety, our customers get the training materials they need from the top vendors in the EH&S market, all from a single point of contact. By listening to our clients needs, we evaluate solutions and present the best options relative to the requirements, saving our customers time and money.

We collaborate with you to create an ideal safety program that is focused on your needs before the product. We un-complicate sourcing and maintaining your safety program resources and assist you through program changes and updates as necessary. Our goal is to be an extension of your safety team, working with you throughout the duration of your program for a win-win solution – the ability to work with a single, customer service focused representative while obtaining industry-leading EH&S training and program resources.

Our products and services include:

- Interactive Online Training Programs
- Virtual Reality Training
- Learning Management Systems
- Onsite Training & Consulting Services
- Streaming Video Programs
- Safety Management Software
- Fleet Driving Programs
- OSHA 10 & 30 Hour Training
- HAZWOPER Training
- Custom Training Productions

Listed throughout this catalog are our vendor's course lists and additional descriptions of the products and services listed above.

For complete course descriptions, demo access and to learn more about course offerings from Evolved Safety, contact us at (616) 916-1178 or visit www.evolvedsafety.com.

Empowering a Safer Workplace with Online Safety Training and Learning Management System (LMS)

Elevate Your Team's Safety Knowledge Anywhere, Anytime.

Online Safety Training & Learning Management System

At Evolved Safety, we've done the legwork for you, sourcing comprehensive online safety training options from top vendors to ensure your workforce is informed on critical safety standards and practices. Our approach ensures that your workforce receives engaging and effective training tailored to your industry and is compliant with key safety regulations from OSHA, DOT, EPA, ANSI, and more.

Our Learning Management System (LMS) enhances this process, providing a centralized platform for managing and tracking your workforce's training, making it easier and more efficient.

Each online training course we offer includes:

- **Interactive Course Design:** Engaging, user-friendly training materials.
- **Industry-Specific Programs:** Tailored to meet the unique needs of various industries.
- **Compliance Assurance:** Adherence to important safety standards.
- **Learning Management:** Simplifies the administration, documentation, tracking, and reporting of training programs.

Evolved Safety stands out for its unique approach to sourcing EH&S training materials without additional fees. We prioritize customer needs, offering a diverse range of training topics for various industries. Evolved Safety acts as an extension of your safety team, assisting through program changes and implementation, ensuring you meet your training goals effectively.

By partnering with us, you save time and resources, bypassing the need to contact multiple vendors and vet materials while ensuring your team's training is comprehensive and up-to-date.

Popular Online Workplace Safety Training Topics:

- Workplace Safety Fundamentals
- Construction Safety
- Electrical Safety
- Equipment & Tool Safety
- Environmental Management
- Hazard Recognition and Control
- Hazardous Chemicals & Substances
- Human Resources
- Emergency Response Planning
- Setting & Process Standards
- Soft Skills
- Transportation and DOT Compliance
- Customized Industry-Specific Safety Training
- Online OSHA 10 & 30 Hour Training
- Online HAZWOPER Training

SCORM & AICC Compliant eLearning

Evolved Safety ensures all online training platforms are SCORM and AICC compliant – but what does that mean for you? SCORM (Sharable Content Object Reference Model) and AICC (Aviation Industry CBT Committee) are standards for e-learning software products. These standards matter because they guarantee that different e-learning tools and courses can communicate effectively, ensuring a seamless learning experience and simplifying the implementation of training programs across various platforms.

- **SCORM (Sharable Content Object Reference Model):** Ensures online courses and Learning Management Systems (LMS) work together smoothly. Key for integrating courses and tracking progress.
- **AICC (Aviation Industry CBT Committee):** An older standard focusing on e-learning compatibility.

Why They Matter:

- **Compatibility:** Ensures different e-learning tools and content are interoperable.
- **Flexibility:** Makes it easy to implement training programs across various platforms.
- **Efficiency:** Streamlines the learning experience, saving time and resources.

Benefits of Online Safety Training

Online safety training is a flexible and cost-effective solution for today's dynamic workplaces. This approach to training offers the convenience of learning at one's own pace, ensuring consistent and up-to-date content delivery across all locations. Integrated learning management systems simplify tracking and management of training, making it an efficient choice for businesses aiming to maintain high safety standards without overextending their resources.

- **Accessibility and Flexibility:** Online safety training allows employees to learn at their own pace and schedule, making it easier to fit training into busy workdays.
- **Consistency in Training:** It ensures a consistent training experience for all employees, regardless of their location, ensuring that everyone receives the same level of instruction.
- **Cost-Effective:** Reduces the need for travel, accommodation, or physical training materials, making it a more budget-friendly option.
- **Up-to-date Content:** Online training platforms can be easily updated to reflect the latest safety standards and regulations, ensuring the most current information is always available.
- **Efficient Learning Management:** Online training platforms often come with integrated learning management systems, enabling easy tracking and reporting of employee progress, compliance, and performance in safety training modules. This feature allows for effective management and assessment of the training's impact.

Explore a wide range of online training and learning management solutions with Evolved Safety. We are dedicated to helping you find the perfect platform that aligns with your goals, providing guidance through implementation and beyond. Schedule a demo today to start your journey towards a more effective training program.

Call us at 616.916.1178 or email info@evolvedsafety.com to get started.

HSI Online Interactive Safety Training »

Engaging training content combined with a powerful system to manage your entire training program.

Competency-Based Online Safety Training

With more than 800 courses covering a wide range of safety topics and hazards, plus many HR requirements, off-the-job topics and soft skills, SafetySkills offers the most comprehensive catalog of dynamic and engaging interactive courseware.

Courses are available in full length and microlearning versions. Microlearning courses are between 2-15 minutes in length so you can train your employees on a specific topic quickly and effectively. All online training courses offer:

- Competency-based content to ensure your learners know how to safely perform their job
- Engaging, interactive content
- Mobile compatibility
- IACET accredited and CEU's available
- Regulatory compliant for both regional and international standards
- Flexible and affordable

UL Online Interactive Courses »

We support what matters to you — safety, quality, sustainability and confidence.

UL's Workplace Health and Safety course library offers self-paced training that is engaging, consistent and measurable. You and your trainees can access or manage training 24/7 from virtually any Internet-connected computer. All courses are developed by a team of certified safety professionals and adult learning experts, and are continuously updated to address compliance requirements. The in-house Professional Learning Services team maximizes employee learning and retention with rich multimedia features including:

- High-quality course narration and text
- Superior high-resolution graphics, 3D animation and illustrations
- Challenging learning activities, knowledge checks and post-tests to reinforce and evaluate employee knowledge
- Intuitive course navigation and bookmarking

UL's flexible delivery and pricing fit any environment, workflow or budget, and our Course Licensing options allow you to run content on your learning management or enterprise software system.

All of UL's Workplace Health and Safety courses conform to AICC and SCORM 1.2 requirements.

Hard Hat VR Training - Immersive Safety and Workforce Training Platform (LMS) »

Virtual Reality Training | Web Based Immersive Training | Traditional eLearning
All in One System

Train your workforce the modern way

Our new Immersive Training Platform delivers VR, Web Based Immersive Training (Web3D), and traditional eLearning inside one unified platform—giving your team the tools to learn anytime, anywhere, in the format that best fits the task.

- One platform
- One login
- One complete training ecosystem

Deliver consistent, measurable, and compliant training across your entire workforce—without juggling multiple vendors or systems.

Why Combine VR, Web-Based Immersive Training & eLearning?

Because your workforce doesn't learn in just one environment.

Different teams and different job tasks require different training formats. With Hard Hat VR, you can blend VR, immersive web based simulations, and eLearning strategically—based on what the job demands.

One System. Multiple Modalities. Centralized Tracking.

Every training asset—VR, web based immersive training, or eLearning—is delivered through one easy-to-use LMS. Assign, track, document, and measure everything from one place.

**VIEW OUR COMPLETE LIST
OF VR TITLES**
www.evolvedsafety.com/vr

Hard Hat VR Training - Immersive Safety and Workforce Training Platform (LMS) »

Virtual Reality Training (VR)

High-risk tasks. Zero risk. Maximum impact.

Hard Hat VR delivers realistic, scenario-based simulations built with input from industry experts. VR enables employees to practice critical skills safely and repeatedly—leading to measurable performance improvement.

Key Benefits

- Up to 75% higher knowledge retention through hands-on immersive learning
- Realistic practice for high-risk or complex procedures
- Eliminates distractions with fully immersive environments
- Standardized scenarios ensure consistent training outcomes
- VR builds real-world confidence and prepares workers for real operational environments.

Web Based Immersive Training (Web3D)

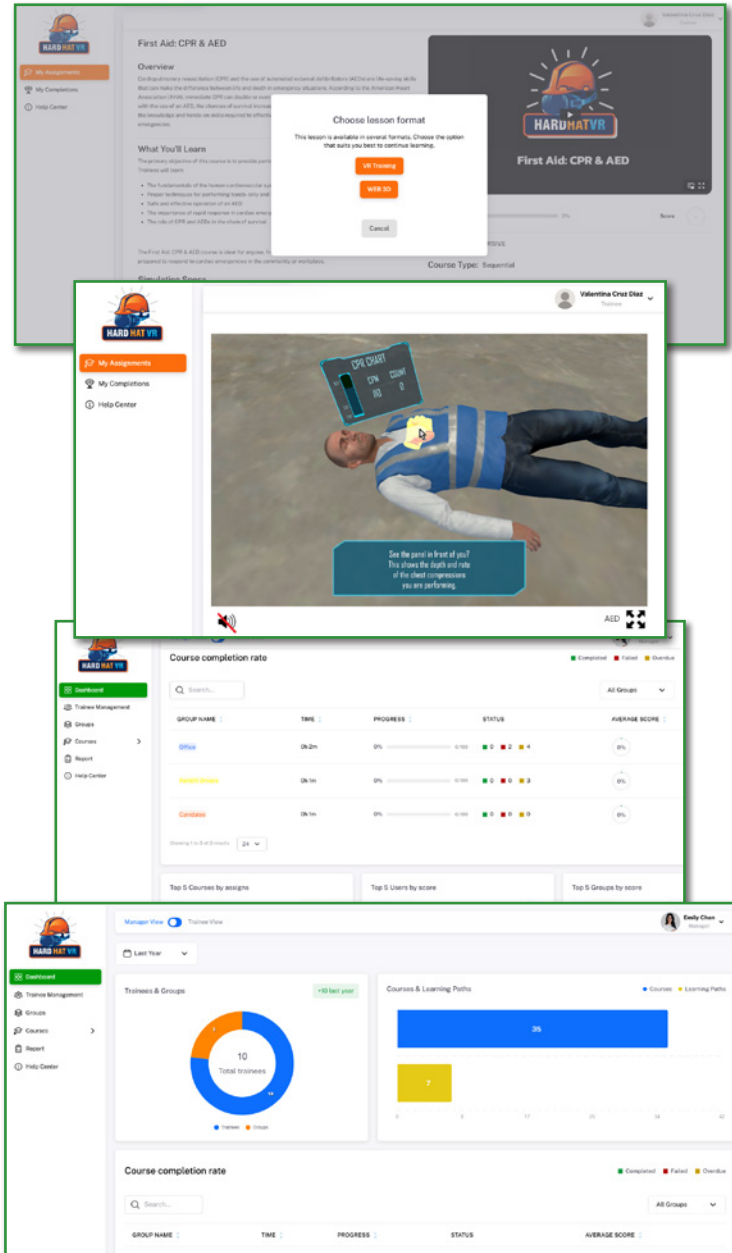

“VR Without the Goggles”

Bring much of the interactivity of VR directly to a computer. These browser-based simulations blend gaming-style learning with real-world scenarios—perfect for scaling training across large or remote workforces.

Key Benefits

- Highly engaging simulations with no hardware required
- Accessible from any computer with an internet connection
- Improves retention through scenario-based practice
- Ideal for distributed teams or high-volume onboarding

Web based immersive training bridges the gap between traditional learning and full VR immersion.

Hard Hat VR Training - Immersive Safety and Workforce Training Platform (LMS) »

Traditional eLearning

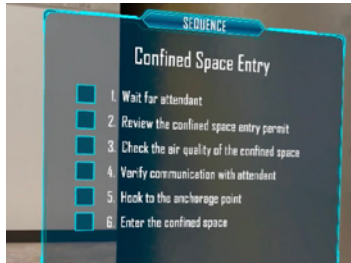

Reliable. Accessible. Essential.

Support compliance, regulatory, and general workforce training with high-quality eLearning modules designed for quick access and broad deployment.

Key Benefits

- Perfect for field teams or employees without VR access
- Meets compliance & documentation requirements
- Supports consistent training across all locations
- Easy to assign, complete, and track

Traditional eLearning remains a critical part of the modern training ecosystem.

The Learning Management System (LMS)

Deliver, Track & Document Everything in One Place

Our LMS modernizes training administration while supporting VR, Web Based Immersive Training, and eLearning—all within a single, simple interface.

Key Benefits

- Centralized assignments, tracking, and reporting
- Audit-ready documentation for compliance
- Integrated VR, immersive web based training, and e-learning delivery
- Automated reminders & progress tracking
- Scales from small teams to global enterprises

Whether replacing an outdated LMS or upgrading to VR-ready delivery, the rollout is fast and seamless.

Why Hard Hat VR?

Practical. Proven. Purpose-built for safety-critical industries.

Hard Hat VR is a leader in immersive safety training—trusted by organizations across construction, utilities, manufacturing, energy, logistics, and government. Our content is built to solve real-world training challenges, not just look impressive.

We deliver:

- Realistic, industry-validated simulations
- A complete ecosystem connecting VR, immersive web based training, and traditional eLearning
- Centralized LMS delivery and reporting
- Scalable training solutions designed for operational environments

Hard Hat VR empowers your organization to modernize training, reduce incidents, improve retention, and increase workforce readiness.

Hard Hat VR Training - Transforming Workforce Training »

- Easy Implementation and Training Delivery
- Affordable Monthly or Yearly Subscriptions
- Extensive, Growing Library

Full list of our VR/Web3D Courses:

Chemical Spill Cleanup
Confined Space Entry
Direct Report Meeting
Electrical Hazards
Excavation & Trenching
Fall Protection
Fire Evacuation
Fire Extinguisher
Fire Hazard Awareness
First Aid: Blood Borne Pathogens
First Aid: CPR & AED
Forklift Inspection
Forklift Operation (VR Only)
Getting Started in VR (VR Only)
Ladder Safety
Lockout Tagout: Electrical Room
Magnum DS Breaker
Medium Voltage Switch
NRX Breaker
Pre-Trip Inspection
Responding to Anger
Scaffolding
Security Breach Awareness
Switchboard Operations (VR Only)

Uninterruptible Power Supply (VR Only)
Warehouse Hazard Awareness (VR Only)
Warehouse Packing (VR Only)
Warehouse Picking: Back End Labeling (VR Only)
Warehouse Picking: CASE (VR Only)
Warehouse Picking: Front End Labeling (VR Only)
Working at Heights
Slips, Trips, and Falls (E-Learning)

Custom VR Development

If you are not seeing what you need please contact us, we provide custom development for most industries, including:

- Construction
- Oil & Gas
- General Industry Safety
- Manufacturing

Content is available in English and Spanish.

Streaming Video Training for Workplace Safety and EH&S Compliance »

Discover the Power of Streaming Video with Evolved Safety

In today's fast-paced work environment, the ability to adapt safety and compliance training quickly and easily is vital. Streaming Video Training equips your organization with the tools to do just that - ensuring your workforce is always up-to-date, no matter where they are.

Streaming Video Training is flexible and easy to tailor to different jobs and work environments for relevant employee training. It includes interactive quizzes that track and record learning in your Learning Management System (LMS), making it an efficient, all-in-one solution for EH&S training.

Why Streaming Video Training?

- **Engaging and Flexible Learning:** Streaming video content captures attention and simplifies complex concepts, making learning effective and engaging for diverse learning styles.
- **Universal Accessibility:** Offer your team the convenience of accessing training material from any location at any time, supporting on-demand learning for on-site and remote work environments.
- **Up-to-date Content:** Stay ahead with updated videos that reflect the latest safety standards and best practices.

The Evolved Safety Advantage

Partner with Evolved Safety for a seamless training experience:

- **Access to Premier Content Creators:** Leverage our partnerships with top streaming video content creators and vendors.
- **One-Stop Resource:** Simplify your training procurement process with access to a diverse range of content through a single source.
- **Expert Support:** We guide you in selecting the best training content for your unique needs and ensuring effective implementation.

The 4-hour Defensive Driving Online Course »

Changing risky driving behaviors

The 4-hour Defensive Driving Online Course now offers even more personalized driver content and advanced technology. It will help your employees become more knowledgeable about safe driving practices, so they will be less likely to be involved in motor vehicle incidents, helping to minimize your corporate liability risks and costs.

This course delivers enhanced interactivity to engage drivers and improve retention. It features real-life driving reenactments, hazard identification and risk-assessment challenges. Plus, the content is tailored to the participant's driving profile, including such factors as age, driving attitudes and behaviors.

What Employees Learn:

- Defensive driving strategies to reduce motor vehicle collisions
- The effects of drugs, alcohol, physical and mental conditions
- How to deal with distracted, aggressive and fatigued driving
- Conditions that impact driving and how to control them
- Importance of occupancy safety devices

Defensive Driving Online Courses deliver real-life driving scenarios that will motivate drivers to change their behind-the-wheel behaviors and attitudes. Through state-of-the-art technology using engaging animation, interactive exercises and adaptive curriculum, employees will learn defensive driving best practices to protect themselves and their company.

NSC Online Driver Training offers a cost effective solution to help:

- Keep your employees safe on the road, on and off the job
- Decrease the risk of motor vehicle collisions and traffic violations
- Minimize exposure to liability risks and costs
- Lower fleet insurance premiums, workers' compensation and accident claims
- Shrink vehicle repair bills and replacement costs

COURSE SESSIONS & DESCRIPTIONS

It's All about Choices

Determine your personal driving profile, driving attitudes and behaviors, defensive driving and collision prevention strategies

Ready for the Road

How various conditions – controllable and uncontrollable — affect your driving. Learn defensive driving techniques to compensate for those situations as well as vehicle maintenance and occupant protection systems

Don't Add Insult to Injury

Impaired, distracted, fatigued and aggressive driving and managing your emotions while driving

Success on the Road

Six most unsafe driving behaviors, hazard recognition driving scenarios and how to apply safe driving techniques

Collision Prevention

Steps to preventing collisions through real-life driving reenactments and identifying road shapes and signs

Driving for Life

Habits of defensive driving and recognizing personal accountability for your driving behaviors and decisions

Post-Test

Professional Truck Driver Online »

Award-winning professional truck driver 4-hour online course

The course focuses on the most common causes of truck-related incidents and provides truck drivers with defensive driving strategies to avoid collisions and traffic violations. The highly-interactive course presents real-life driving situations and hazards and motivates drivers to change their behind-the-wheel behaviors. The new edition contains the latest statistics and interactive technology to fully engage your drivers.

The adaptive curriculum (available in 4-hour course) is tailored to the driver's individual profile and is based on such things as the driver's age, type of vehicle and road conditions. It helps drivers recognize their own personal driving tendencies, attitudes and habits and emphasizes the need for continuous improvement.

What Employees Learn:

- Collision prevention through hazard recognition
- The ramifications of driving at excessive speed
- Physical and mental conditions that can affect driving
- Pre-trip and post-trip inspection procedures
- Safe driving skills related to lane management, passing, turning, following and stopping distances, backing, blind spots and more.

Also available: Professional Truck Driver Classroom Training

If you would prefer classroom training for your employees, the National Safety Council offers a Certified Instructor course. Contact us for details.

NSC Online Driver Training offers a cost effective solution to help:

- Keep your employees safe on the road, on and off the job
- Decrease the risk of motor vehicle collisions and traffic violations
- Minimize exposure to liability risks and costs
- Lower fleet insurance premiums, workers' compensation and accident claims
- Shrink vehicle repair bills and replacement costs

COURSE SESSIONS & DESCRIPTIONS

Professionals in the Roadway Community

Personal responsibilities and professional excellence to factors that contribute to collisions and techniques to maximize safety

The Professional Driver

Professional code of ethics, managing one's physical and mental conditions, aggressive and distracted driving, improving driving habits, and pre-trip, en-route, and post-trip truck inspections

Driving Strategies

Recognize hazards and identify safe and legal alternate choices for dealing with different hazards including speeding, following and stopping distances, lane usage, overtaking and passing and scanning

Handling Challenging Situations

Addresses head-on collisions, navigating through intersections safely, and identifying proper backing maneuvers

Post-Test

Onsite Training & Consulting Services »

From safety program development to litigation support, Evolved Safety works with vendors to provide a custom onsite solution for your safety program. Our large network of trainers and consultants is available throughout the United States, ensuring quality and consistent results no matter the size of your organization or number of employees. Services include audits and inspections, industrial hygiene exposure monitoring, respiratory fit testing, program and project management, safety professional placement, OSHA VPP preparation, and more.

PROGRAM DEVELOPMENT

- Safety meeting development
- PICS and ISNetWorld Compliant
- Written site-specific health and safety plans (EM385-1-1 Compliant)
- Permit required confined space entry programs
- Hazcom programs
- Emergency action and response plans
- Respiratory protection plans
- Exposure control (bloodborne pathogens) programs
- Chemical hygiene programs
- Fire prevention

AUDITS AND INSPECTIONS

- On-site audits
- Lockout/tagout
- Respiratory protection
- Confined Space
- Machine guarding
- Hazcom
- On-site industrial hygiene
- On-site environmental audits
- Mock OSHA inspections
- Mock EPA Audit
- Mock DOT Audit

INDUSTRIAL HYGIENE EXPOSURE MONITORING

- Chemical exposure assessments
- Noise assessments
- Ergonomic assessments

LITIGATION SUPPORT

- OSHA citation review, assessment and defense
- Expert witness testimony

PROGRAM/PROJECT MANAGEMENT

- Project management and oversight
- Emergency contingency planning
- Injury assessments and recordkeeping
- Injury claims management
- Incident investigation
- Safety committee assistance
- Training tracking

ASSESSMENTS AND ANALYSIS

- Environmental and regulatory overview (RCRA, CERCLA, OPA, CAA, CWA, etc.)
- Program needs assessments
- Training needs assessments
- Ventilation/Dust collection assessments
- Site hazard assessments
- Activity hazard/job safety analysis
- Arc flash
- Gap analysis

Custom Training Solutions for Empowered Learning »

Design the Perfect Learning Experience for Your Organization's Unique Needs

Virtual Reality | eLearning | Streaming Video | Hybrid/Blended

Each workplace is defined by its unique environment and the dedicated people who operate within it. This is why custom training productions are so effective; they align with the specific needs of your workplace, ensuring maximum relevance and impact in your training efforts. Employees are more likely to understand and remember information that directly applies to their daily tasks and surroundings, improving best practices and overall workplace efficiency.

Evolved Safety, in partnership with top producers, specializes in developing custom training programs that cater to the distinct requirements of your workplace. Our service encompasses every aspect of production, offering a seamless and high-quality experience. This includes scriptwriting, on-site filming, professional multi-language narration, music, voice talent, course design and programming, 3D animation, and comprehensive digital post-production.

- **Versatility for Any Company Size:** Our team collaborates with your in-house experts to quickly develop specialized training, leveraging your existing materials, whether you're a small business or a large corporation.
- **On-Site Media-Rich Content Creation:** On-location filming enables us to produce new, media-rich training content, covering everything from company policies to detailed machine operation guides.
- **Content Migration and Transformation:** Transform outdated eLearning or workshop content into modern, interactive formats and convert traditional classroom materials for eLearning, video, or VR implementation.
- **Interactive Learning Experiences:** We excel in programming relevant interactions and simulations, enhancing learner retention and ensuring a more engaging and effective training experience.
- **Full Control Over Content:** While we bring our expertise, you maintain complete control over the course content, allowing customization that suits your training needs.

Choosing Evolved Safety means partnering with a team that elevates your training program. When it's time to take control of your training, we're more than a service provider; we're an integral part of your team.

Custom Training Solutions for Empowered Learning »

Custom Training Use Cases

- Onboarding Compliance
- Machine-Specific Training
- Company Messaging
- Sales Training
- Customer Facing Product Training

Custom Training Production Formats

Virtual Reality Training

- **Customized 3D Animation:** Detailed virtual environments and scenarios tailored to your workplace.
- **Interactive Simulations:** Engaging, realistic exercises for skill development and scenario training.
- **Narrative Development:** Storylines and scenarios developed to match your training objectives.
- **Voice-Over Narration:** Professional audio narration to guide and enhance the VR experience.
- **Post-Production Enhancements:** Final touches, including sound design and visual effects, to ensure a polished, immersive training module.

eLearning

- **Instructional Strategy Development:** Crafting effective educational strategies and learning paths to achieve desired training outcomes.
- **Interactive Content Development:** Creating engaging and interactive learning modules, including quizzes and exercises.
- **Multimedia Integration:** Incorporating videos, animations, and graphics to enhance the learning experience.
- **Custom Scriptwriting and Storyboarding:** Develop tailored content and visual plans to meet specific learning objectives.
- **Voice-over and Audio Production:** Providing professional narration and sound design for a more immersive eLearning experience.
- **Responsive Design for Multiple Devices:** Ensuring eLearning modules are accessible and optimized for various devices, including computers, tablets, and smartphones.

Video / Streaming Video Training

- **Custom Script and Storyline Creation:** Developing unique scripts and storylines tailored to your specific training needs.
- **Professional On-Site Filming:** Capturing content directly at your location with a professional crew.
- **Expert Post-Production Editing:** Fine-tuning the final video with cutting-edge editing techniques for a polished finish.
- **Streaming Optimization:** Ensuring smooth playback and accessibility across various streaming platforms and devices.

Hybrid/Blended Learning

- **Optimized Learning Mix:** Crafting a strategic blend of eLearning, workshops, and practical on-the-job experiences to enhance skill development and learning efficiency.
- **Performance-Focused Design:** Analyzing performance needs to develop a targeted learning experience that maximizes learner engagement and your return on investment.
- **Seamless Integration:** Combining various training formats into a cohesive, compelling learning journey tailored to specific organizational goals and learner requirements.
